

5. Ellipse Tool Project - Circles

The Ellipse tool is used to draw ovals and circles. To draw circles, you need to press the **Shift** key while you are using the tool. This project uses the Ellipse tool to make a drawing with circles.

Step One

Open Paint, and click the Ellipse tool icon to select the Ellipse tool. Then check to make sure that the first Ellipse option is selected in the space at the bottom of the toolbox.

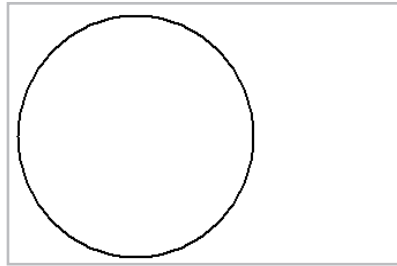

Paint toolbox with Ellipse tool selected.

Paint toolbox with first Ellipse option selected.

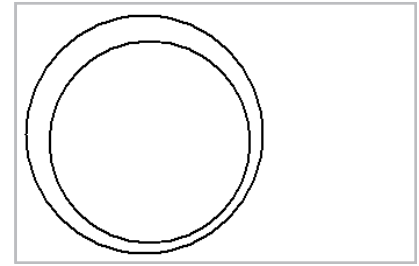

Step Two

Point to a place inside the canvas, press the **Shift** key on the keyboard, then click-and-drag to make a circle. Release the left button to finish.

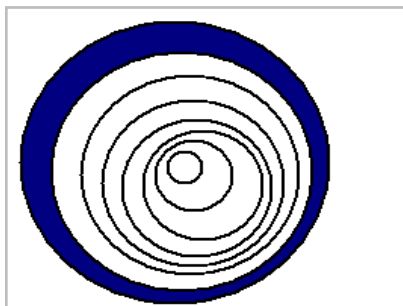

Step Three

Point to a place inside the first circle, press the **Shift** key on the keyboard, then click-and-drag to make a circle inside the first circle.

Step Four

After you have finished drawing your circles, use the Fill-With-Color tool to fill the white spaces.

Step Five

Use a different color for each space until you have filled all of them.
