### Computer Basics - Saving, Closing, and Opening a File

#### Overview

This part is about

- how to save a file.
- how to close a file.
- how to open a file.

### Saving work as a file

Saving your work as a file allows you to use it again in the future. You do not have to complete your work before you save it; in fact, it is a good idea to save your work from time to time as you are working so that if something happens to cause the computer to stop running, you will not lose what you have been working on.

Saving your work is a two step process:

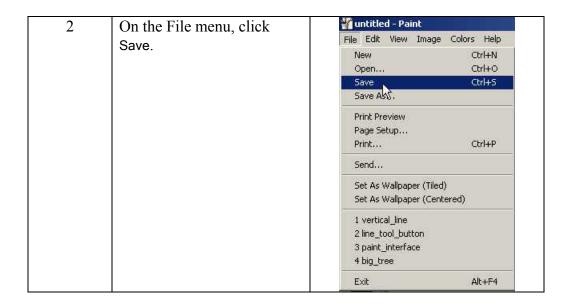

- 1. You give your file a unique name.
- 2. You save your file in a folder on the hard drive or on another storage device such as a floppy disk.

Many files can be stored in the same folder.

## Saving a drawing as a graphic file

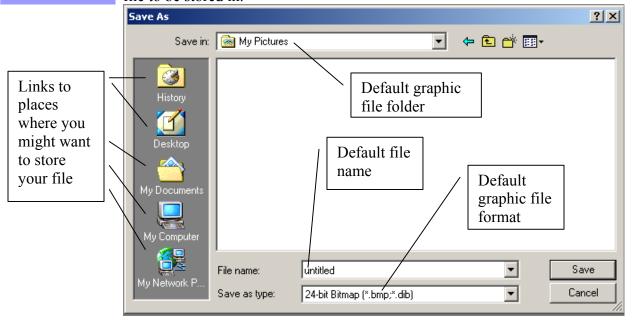

Follow the procedure below to save a drawing you have made in Paint as a graphic file.

| Step | Action                       | Reference                       |  |
|------|------------------------------|---------------------------------|--|
|      | On the Menu bar, click File. | 🎬 untitled - Paint              |  |
| •    | on the Mena sar, ener inc.   | File Edit View Image Colors Hel |  |
|      |                              | NEW Ctrl+N                      |  |
|      |                              | Open Ctrl+0                     |  |
|      | Save Ctrl+S                  |                                 |  |
|      | Save As                      |                                 |  |
|      | Print Preview                |                                 |  |
|      |                              | Page Setup                      |  |
|      | Print Ctrl+P                 |                                 |  |
|      | Send                         |                                 |  |
|      |                              | Set As Wallpaper (Tiled)        |  |
|      | Set As Wallpaper (Centered)  |                                 |  |
|      | 1 vertical_line              |                                 |  |
|      |                              | 2 line_tool_button              |  |
|      |                              | 3 paint_interface               |  |
|      |                              | 4 big_tree                      |  |
|      |                              | Exit Alt+F4                     |  |

## The Save as dialog box

After you click Save, the Save as dialog box appears. This is used to tell the computer where you want your file to be stored and the format you want your file to be stored in.

| Step | Action                         |               | Reference                     |          |
|------|--------------------------------|---------------|-------------------------------|----------|
| 3    | After the Save as dialog box   | File name:    | untitled                      | Save     |
|      | appears, click inside the File | Save as type: | 24-bit Bitmap (*t.bmp;*t.dib) | ancel    |
|      | name field and type a name     |               |                               |          |
|      | for your file.                 | File name:    |                               | iave     |
|      | -                              | Save as type: | 24-bit Bitmap (*.bmp;*.dib)   | ancel // |

Don't change the Save in or Save as type fields. Click Save button.

Save

#### Closing a file

Closing a file when you are in an application program clears the file from the screen. You close a file when you no longer want to work on it.

# Closing a graphic file in Paint

After you have saved your file, follow the procedure below to close a file in Paint.

| Step | Action                       | Reference                        |
|------|------------------------------|----------------------------------|
| 1    | On the menu bar, click File, | My first picture - Paint         |
|      | then click New.              | File Edit View Image Colors Help |
|      |                              | New Ctrl+N                       |
|      |                              | Open ゆ Ctrl+O                    |
|      |                              | Save Ctrl+S                      |
|      |                              | Save As                          |
|      |                              | Print Preview                    |
|      |                              | Page Setup                       |
|      |                              | Print Ctrl+P                     |
|      |                              | Send                             |
|      |                              | Set As Wallpaper (Tiled)         |
|      |                              | Set As Wallpaper (Centered)      |
|      |                              | 1 My first picture               |
|      |                              | 2 data_processing                |
|      |                              | 3 Start_search_files             |
|      |                              | 4 windows_explorer               |
|      |                              | Exit Alt+F4                      |
|      |                              |                                  |
|      |                              |                                  |
|      |                              |                                  |

#### Opening a file

There are three basic ways to open a file that you have saved. You can open a file from the program that was used to make it, from Windows Explorer, or from Search.

Opening a file in Paint using Open

Follow the directions below to open a file in Paint using Open.

| Step      | Action   | Reference   |
|-----------|--|---|
| Step<br>1 | Action On the Menu bar, click File.  | Reference  Intitled - Paint  File Edit View Image Colors Help  New Ctrl+N Open Ctrl+O Save Ctrl+S Save As  Print Preview Page Setup Print Ctrl+P  Send  Set As Wallpaper (Tiled) Set As Wallpaper (Centered)  1 My first picture                      |
| 2         | On the File menu, click<br>Open  | Exit Alt+F4  Intitled - Paint  File Edit View Image Colors Help  New Ctrl+N  Open Ctrl+O  Save Ctrl+S  Save As  Print Preview  Page Setup  Print Ctrl+P  Send  Set As Wallpaper (Tiled)  Set As Wallpaper (Centered)  1 My first picture  Exit Alt+F4 |
| 3         | When the Open dialog box appears, click the name of the file you wish to open. | Copen  Look in My Pichares  |
| 4         | Click Open button.   | Open  |

Opening a file in Paint using the filename

If you are opening a file that was recently saved in Paint, you can also open it by clicking the file's filename in the File menu.

To open a file by clicking the filename, follow the directions below.

| Step | Action                       | Reference                        |
|------|------------------------------|----------------------------------|
| 1    | On the Menu bar, click File. | Y untitled - Paint               |
|      |                              | File Edit View Image Colors Help |
|      |                              | New Ctrl+N                       |
|      |                              | Open Ctrl+O                      |
|      |                              | Save Ctrl+5 Save As              |
|      |                              | odve As                          |
|      |                              | Print Preview                    |
|      |                              | Page Setup Print Ctrl+P          |
|      |                              |                                  |
|      |                              | Send                             |
|      |                              | Set As Wallpaper (Tiled)         |
|      |                              | Set As Wallpaper (Centered)      |
|      |                              | 1 My first picture               |
|      |                              | Exit Alt+F4                      |
| 2    | On the File menu, click the  | ₩ untitled - Paint               |
|      | name of the file you wish to | File Edit View Image Colors Help |
|      | open.                        | New Ctrl+N                       |
|      |                              | Open Ctrl+O<br>Save Ctrl+S       |
|      |                              | Save As                          |
|      |                              | Print Preview                    |
|      |                              | Page Setup                       |
|      |                              | Print Ctrl+P                     |
|      |                              | Send                             |
|      |                              | Set As Wallpaper (Tiled)         |
|      |                              | Set As Wallpaper (Centered)      |
|      |                              | 1 My first picture               |
|      |                              | Exit Alt+F4                      |

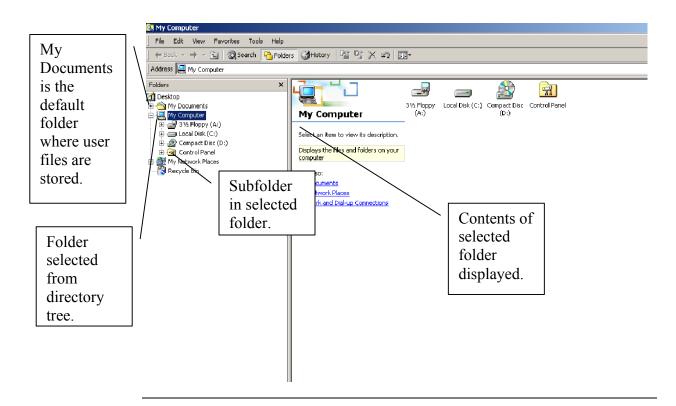

Opening a file using Windows Explorer

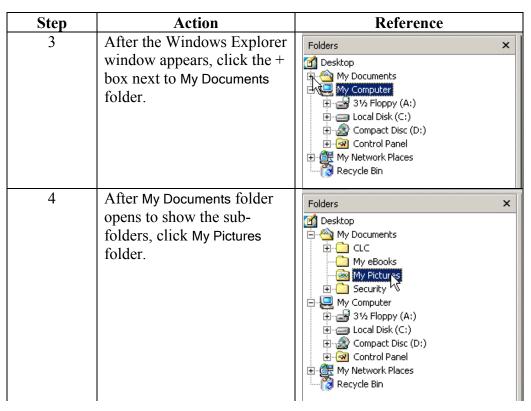

Windows Explorer is a program that allows you to see all of the files stored in your computer. You can open a file you saved in Paint using Windows Explorer by right-clicking the file's filename.

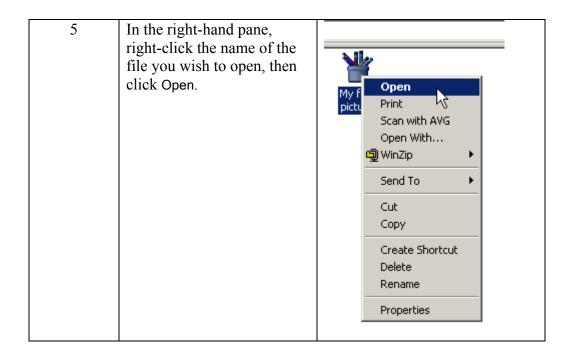

To open a file you saved in Paint using Windows Explorer, follow the directions below.

| Step | Action   | Reference   |
|------|--|---|
| 1    | On the Windows desktop, right-click My Computer. |   |
|      |  | Open Explore Search Manage  Map Network Drive Disconnect Network Drive Create Shortcut Rename  My Doc Properties              |
| 2    | Click Explore.                                   | Open  My Cor  Explore Search  Manage  Map Network Drive  Disconnect Network Drive  Create Shortcut Rename  My Doc  Properties |

The Windows Explorer window After you click Explore, the Windows Explorer window appears. The left-hand pane shows the directory tree of all the file folders and the files they contain that are saved on your computer. Clicking a file folder in the left-hand pane displays its contents in the right-hand pane.

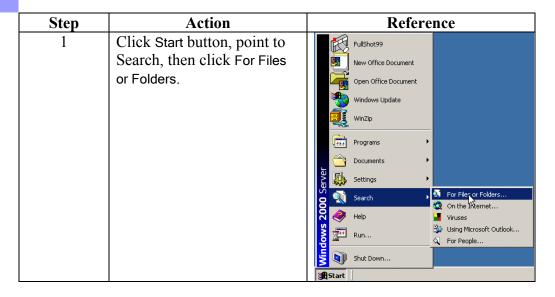

### Opening a file using search

If you cannot remember where you saved a file, you can look for it using Search. Search looks for the all files that match the name of the file you are looking for. Once you locate your file, you can open it from Search.

To open a file using Search, follow the directions below.

The Search dialog box

After you click For Files and Folders, the Search Results dialog box appears. This is used to find files that you have lost.

Type the filename of the file you are looking for in this field.
